CAREER OBJECTIVE

To start my career in a good organization where I can learn, grow, and contribute to the success of the company.

EDUCATION

- Anantha Lakshmi Institute of Technology & Sciences, Anantapur BTECH (Artificial intelligence and Machine Learning), 80% — 2021 to 2025
- Sri Chaitanya Junior Kalasala, Intermediate, 88% — 2019 to 2021
- Pranav Sai English Medium High School, SSC, 92% — 2018 to 2019

SKILLS

- Programming Languages: Python, C, HTML, CSS, JavaScript
- Frameworks & Libraries: Django, React.js, Express.js, Node.js, Hadoop, NumPy, Pandas, Matplotlib
- Databases: MySQL
- Tools & Platforms: GitHub, Postman, Visual Studio Code, Jupyter Notebook, Eclipse, PyCharm, MS Excel,Tensorflow,PyTorch,Scikit-Learn
- Technologies: Data Science, RESTful APIs, Data Analytics, Mobile App Development.

Projects

Sentiment Analysis in Emergency Calls (Python, NLP, Machine Learning, Django) Responsibilities:

- Directed the development of an NLP-driven system leveraging Python and Django to analyze emergency call transcripts, enhancing data visualization clarity rated as 'improved' by 80% of users.
- Engineered a sentiment analysis system employing Python, Pandas, Scikit-learn, and Django resulting in an 18% improvement in dispatch decision accuracy using historical datasets for model training.
- Pioneered a RESTful API integrating real-time crime predictions, yielding enhanced data visualizations for police response teams and improving situational awareness by 20%.
- Automated preprocessing of unstructured text data, reducing manual intervention by 40% and accelerating model training cycles.
- Designed interactive dashboards that provided real-time insights, enabling faster decision-making for emergency responders.
- Reduced average emergency response planning time by 15% through automated sentiment-based prioritization of distress calls.

Certifications

- Data Analysis Using Python
- Introduction to IoT
- Flipkart GRiD 6.0 – Software Development Track
- Generative AI

Soft Skills

- Resolved 85% of coding errors during project development by debugging and optimizing algorithms, reducing execution time by 20%.
- Coordinated with a 4-member team to deliver a full-stack project within deadlines, improving project delivery efficiency by 15% through clear documentation and knowledge sharing.
